## Aviary for rearing

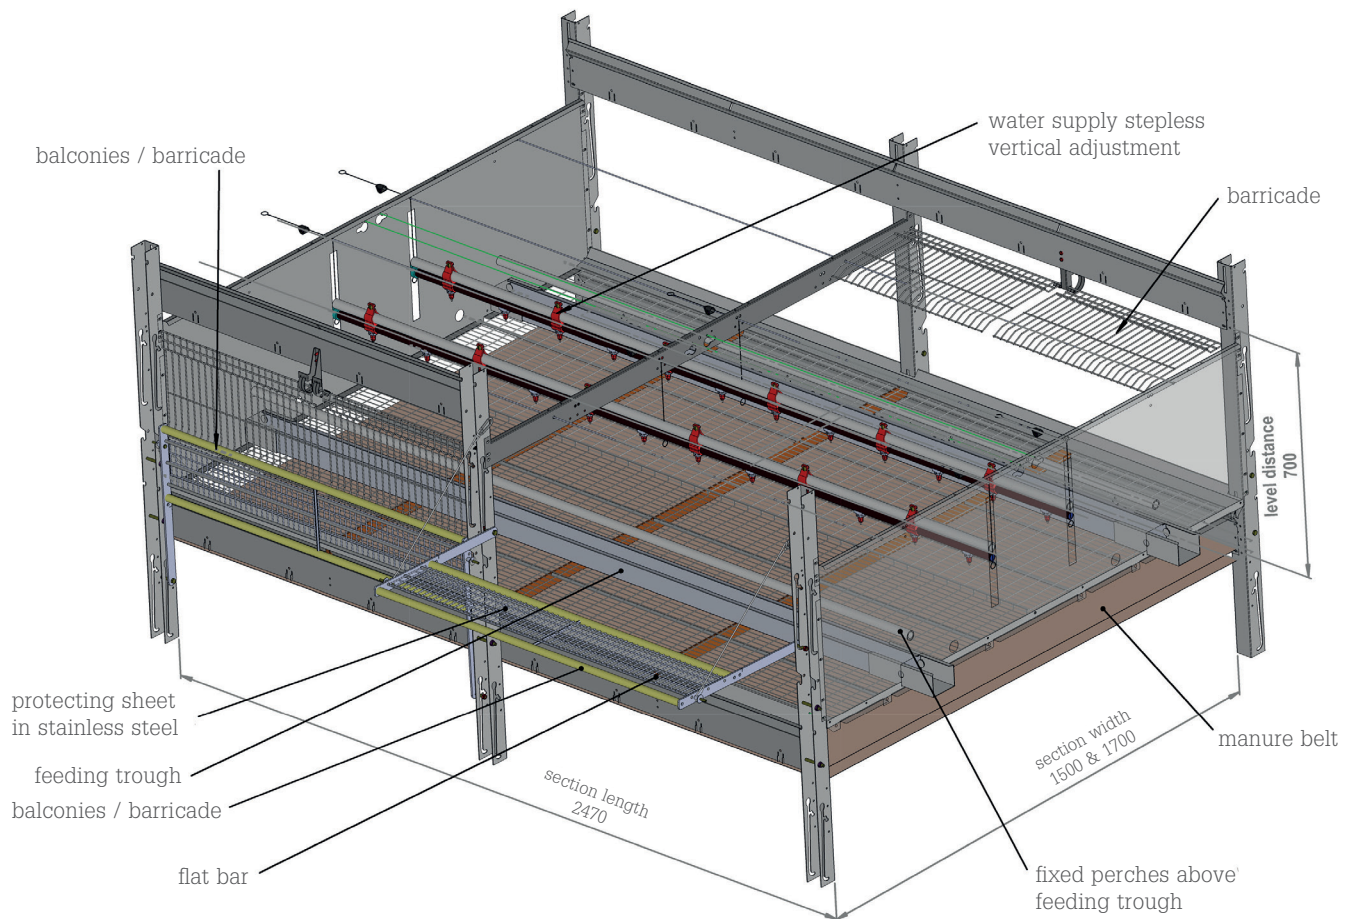

## AVIARY FOR REARING

The Aviary for rearing addresses the specific needs of both the pullets and the pullet operator owner.

- > Offers a spacious aviary environment
- > Guarantees a good healthy start and trouble free transition for pullets to the commercial laying system
- > The balconies are used to train the birds to go up and down in an aviary system.  
Also used to close the system in an easy way.
- > Ample perch space on all tiers
- > Easy animal control and a very good overview
- > Chick pullet guard on feeding trough
- > Adjustable watering as birds grow
- > Available up to 4 tiers
